Staph

About 25% of people normally carry staph in the nose, mouth, genitals, or anal area. The foot is also very prone to picking up bacteria from the floor.

One type of staph infection that involves skin is called cellulitis and affects the skin’s deeper layers.

MRSA

Reduced 96.24%

After 30 minutes of the GPS Purifier Activation

MRSA is a “staph” germ that does not get better with the first-line antibiotics that usually cure staph infections. Once the staph germ enters the body, it can spread to bones, joints, the blood, or any organ, such as the lungs, heart, or brain.

E. coli

Reduced 99.68%

After 15 minutes of the GPS Purifier Activation

E. coli is commonly found in the lower intestine of warm-blooded organisms. B. coli in the colon are harmless, but some strains can cause serious food poisoning in humans.

C. difficile

Reduced 86.87%

After 30 minutes of the GPS Purifier Activation

C. difficile bacteria naturally reside in the gut and some people accidentally ingest spores of the bacteria while they are patients in a hospital, or similar facility. The bacteria release toxins that can cause diarrhea, with abdominal pain, which may become severe. In rare cases this can progress to a life-threatening condition.

TB

Reduced 69.01%

After 60 minutes of the GPS Purifier Activation

Tuberculosis most commonly affects the lungs but also can involve almost any organ of the body. Fifty years ago, this disease was referred to as “consumption” because without effective treatment, these patients often would waste away. Today tuberculosis usually can be treated successfully with antibiotics.

Airborne Mold Spores
